For the attention of Mr Michael Byrne

Dear Michael,

"Pan-Channel Island Consultation on Retail Price Control Review 2015"

With reference to your document CICRA 15/10 dated March 2015, please find Jersey Airtel's Limited & Guernsey Airtel Limited (together hereafter referred to as "Airtel") response below,

Airtel are in agreement with CICRA's position on Retail Controls for JT and SURE with the exception of Question 8 below:

***Does the respondent agree that CICRA should apply a RPI – 10% price control for JT (Jersey)?
If the respondent does not agree with this then please provide a full justification for the response and suggest an alternative.***

Airtel's reason being that fundamentally all the evidence articulates that Jersey prices are 33% higher than those in Guernsey, therefore Airtel believe consumers should not have to wait 3 years to achieve parity when a onetime drop of 30% would achieve that immediately.

We trust our response and comments meet with your approval and please do not hesitate to contact the undersigned should you have any further questions in this respect.

Yours sincerely

Ms Lisa Moyse
Head-Roaming & Regulatory Affairs
