1. Introduction

The OUR is publishing in this report an updated list of mobile phone mast locations in the Bailiwick of Guernsey. The register has been compiled from information provided by the three mobile operators and reflects the position at the 1st June 2010.

Currently there are 77 mobile mast locations in the Bailiwick (up from 71 in 2009). During the past 12 months, all three operators have added, or applied for planning consent to add more sites to the number previously reported or to share established sites with other operators, while some sites have been recovered. The information provided by the mobile operators shows that there are 31 shared sites through the Bailiwick. These are broken down by island as follows:

Island	Number of Sites
Guernsey	63
Alderney	6
Sark	6
Herm	2

It should be noted that where we refer to ‘antennae sites’ this is used to describe all sites utilised by mobile phone companies regardless of type. The sites used vary considerably and include roof-top locations, indoor and outdoor wall mounted antenna, more traditional lattice tower structures and monopoles. Some sites feature more than one type of antenna structure. By structure type, the breakdown is as follows:

Type of Mounting	Number
Roof-Top	26
Monopole	27
Lattice Tower	11
Outdoor Wall Mounted	10
Indoor Wall Mounted	9
Water Tower	2
