15 July 2021

### **Channel Island Telecoms Sector Weathers Covid Storm**

Home working, Zoom meetings and Island wide lockdowns all had an impact on the Channel Island telecoms sector last year, according to a new report published this week.

The Telecommunications Statistics and Market Report 2020 was compiled by Statistics Jersey on behalf of the Guernsey Competition & Regulatory Authority (GCRA) and the Jersey Competition Regulatory Authority (JCRA). It shows the impact of the COVID-19 pandemic and provides a wider overview of the telecommunications market, including detailed analysis of specific networks such as fixed line broadband, the mobile market and an overview of off-Island links.

The report shows overall revenues were down slightly but the sector still made a valuable contribution to the Islands' economies:

- Generated turnover, including fixed, mobile, Internet access, associated services and the sale of handsets of £166.6m; £62.6m in Guernsey and £104.1m in Jersey
- Employed 794 full time equivalent staff as at the end of 2020; 211 in Guernsey and 583 in Jersey
- Contributed £20.5m to the exchequers through corporate, staff, and social taxes (including GST payments in Jersey); £6.1m in Guernsey and £14.4m in Jersey
- Invested £21.1m in capital projects; £3.6m in Guernsey and £17.5m in Jersey

The effects of the pandemic can be seen clearly in changes to the way we used our telecoms services:

- In 2020, both Islands showed a rise in the number of fixed call network minutes (Guernsey by 7.6% and Jersey by 10.8%) following a period of continuing decline over the last 6 years
- Continuing a strong upward trend, both Islands experienced accelerated increases in data usage per subscriber per month in 2020: in Guernsey data usage rose by 38.1% while in Jersey it increased by 42.8%
- The total number of mobile call minutes increased by 26.9% in Guernsey in 2020 and 22.5% in Jersey
- Mobile data volumes have increased by 38.2% in Guernsey and by 25.6% in Jersey
- Despite increases in mobile minutes and data volume, mobile revenue has fallen, driven partly by a 69% decrease in out-roaming revenues (caused by the dramatic reduction in the number of people travelling)

In a joint statement the GCRA and JCRA said, “2020 was a challenging year for all sectors of the economy, but the Islands’ telecoms operators have demonstrated their resilience and flexibility in managing a very complex situation. Businesses and their staff had to adapt to new ways of working very quickly, and robust telecoms networks were essential to the success of that transition.

“Our telecoms sectors are well regulated, enjoy a healthy level of competition and are invested in technological innovation and infrastructure.

“This independent report shows that while the sector did not grow overall in terms of revenue, it managed to hold its ground and continue to play an important part in the overall strength of our economies, not just in financial but in human and technological terms. We would like to thank Statistics Jersey and the telecom operators for their work in compiling this snapshot of the industry.”

The full report is available on the [Statistics Jersey web page](#) and will be published on both the GCRA and JCRA websites as well.

## **NOTES TO EDITORS:**

**Please find attached infographics summarising the key data, which are free for your use (please credit Statistics Jersey).**

The data used to compile this report has been provided by the Channel Islands' licensed telecoms operators using an agreed set of data definitions. The accuracy of the data is the sole responsibility of the operators. Statistics Jersey has not audited the data, although it has compared the 2020 submissions with the previous year and provided the operators with the opportunity to review their data and to make adjustments where they feel necessary for both 2019 and 2020.

For further information or interviews with the GCRA or JCRA, please in the first instance contact ORCHID.

### **About the Guernsey Competition & Regulatory Authority:**

The Guernsey Competition & Regulatory Authority (GCRA) (formerly the Office of Utility Regulation) was established under The Guernsey Competition & Regulatory Authority Ordinance, 2012. The GCRA is responsible for regulating the telecoms, postal and electricity sectors and for the administration and enforcement of the Guernsey competition law since it came into force on 1 August 2012.

### **About The Jersey Competition Regulatory Authority:**

The JCRA was established under the Competition Regulatory Authority (Jersey) Law, 2001. It is responsible for administering and enforcing the Competition (Jersey) Law 2005 and also regulates the telecoms and postal sectors and the Ports of Jersey.

The JCRA strives to ensure that the markets work well for the benefit of all stakeholders, including Government, business, citizens and consumers facilitating best value, choice and access to high quality services.
